

This technical drawing illustrates the engineering details for a road intersection. The central feature is a curved road segment defined by blue centerline and red edge lines, with stationing labels such as 51101:003:0064 and 51101:002:0073. To the left, a straight road labeled 'Vestervalli tn 17d' intersects at an angle. The drawing includes numerous symbols for drainage (blue arrows pointing to manholes), lighting (cylinders with cross-hairs), and traffic signs (rectangles with numbers). Elevation points are marked with dots and numerical values (e.g., 30.87, 30.67, 30.22, 29.89). Property boundaries are shown as dashed orange lines. Various colored lines (green, purple, pink) represent different utility or planning zones. The overall layout is a detailed plan view used for construction and regulatory purposes.
